

Characteristics:

- 1) Adopts Tube in Shell heat exchanger and with inbuilt Circulating Pump inside.
- 2) Efficient Rotary compressor; Safe, Reliabiles, Stable running & durable.
- 3) Efficient Saginomya four-way valve; It is very efficient in defrosting in low ambient temp
- 4) Electronic Expansion Valve (EEV) ; Making sure the best velocity of flow. that make the system to run in a stable state and reduce trouble
- 5) Tube in tube heat exchanger inside with higher heat exchange efficiency than tube in shell heat exchanger used by others, with higher reliability & longer lifetime.
- 6) Green & Environment-friendly Refrigerant : R410A or R134A
- 7) Full consideration for noise control; Compressor rubber feet specially selected to reduce vibration.
- 8) Unique super energy saving controlling system can save extra 10% energy than other units in market.
- 9) Reliable Design and Strict Quality Control; All products 100% are tested and run at the factory to assure proper operation of all components and safety switches.

Features and Protection :

High pressure protection	When water flow is too small or water temp. too high ,will prevent compressor to be damaged
Low pressure protection	protection When refrigerant leaked , prevent compressor work without pressure.
Anti - freezing protection	Prevent water pipes and water tank freezing
Water pressure protection	Water tank equipped with safty valve(T/P valve) to prevent water tank to be damaged

Timing function	Freely set heat pump start/stopping time.	
Manual switch	Seperated start/stop signal can be connected with solr system(for choice)	
WIFI *	Controller with WIFI function, can monitor/set water tank temp.,start /stop heat pump by mobile .	
Super energy	saving mode Can save extra 10% energy than other heat pump on the market
